

AWS 948 Delta Hybrid Studio Production Console

The Solid State Logic AWS Truck features an **AWS 948 Delta** hybrid studio production console and a collection of **SSL I/O** and **SuperAnalogue™** outboard processors demonstrating the production power of Pro Tools and Logic DAW integration in stereo and 5.1 surround.

Digital audio is routed from the DAW to **SSL Alpha-Link AD/DA** converters via **Dante** and SSL's **Network I/O MADI-Bridge**. The AWS 948's unique **Dual Path Channel Strip** means each channel has a single Mic Amp and two line level inputs, a new Stereo EQ, and Stereo Insert. This new channel enables three different operating modes: **Stereo Mix**, **In Line Mix** and **In Line Tracking**. These differing modes offer a wealth of workflow options that enhance today's versatile production environments.

Channel configuration and Setup is accomplished via the AWS 948 onboard **TFT screen and soft keys**, and it is even possible to move or divide the channels processing resources (EQ, Insert etc.) between each of the dual paths.

Nucleus² Digital Audio Workstation & Studio Controller

Nucleus² offers a perfect blend of advanced DAW control, transparent **SuperAnalogue™** monitoring with talkback, SSL console grade mic pres, pro quality **Dante audio interface** and bundled SSL **Duende Native** plug-ins. There is no other product available which offers the professional producer all of these elements, with benchmark audio performance and elegant ergonomics.

Not only is it unique, but Nucleus² offers a compact, portable desktop unit that creates a comfortable, efficient, hands on operating environment for DAW-based Music and Film/TV Post production. It provides everything needed to record and monitor audio, and to control a DAW quickly and efficiently without resorting to use of a mouse.

Our Dante-based network includes the **SSL Stagebox** and allows us to demonstrate the benefits of a Nucleus² education lab: Multiple student workstations can share audio sources from a single or multiple recording spaces... AND all the audio is controllable by the instructor, all via Dante.

Also featured on our demonstration truck are the **TotalRecall™**-equipped **X-Rack** modular outboard system and SSL's unique **Sigma Analogue Mix Engine**. Guests can experience the sound clarity of SSL's SuperAnalogue and the accelerated workflow of our new hybrid technology with Delta-Control.
